ANIMAL WELFARE STATEMENT

Our milk is responsibly and sustainably sourced from family farms across the North East and North West of England. Each farm is visited by our Technical Director who has a vast knowledge and history of the dairy farming process including the expected levels of animal welfare. Once the farm has been visited, we then make our decision on whether the supplier meets our standards before entering a supply contract. As a business, we have not come across any situation where we have found there to be any mistreatment of animals, poor welfare or misconduct in the farm.

As a family ran business originating from a dairy farm, we pride ourselves on the quality and reputation of our suppliers and the standards they manage their farms to. These are audited by our internal staff and external companies.

Any milk which is purchased from brokers or other processors goes through the same process to ensure we are supplied milk from reputable, sustainable and responsible suppliers.

In addition to this we also only purchase milk from Red Tractor assured farms and refuse to deal with any suppliers, brokers of other dairy processors who are not members of the scheme. While saying this, it is rare for us to come across this issue. For more information on this please visit their website at www.redtractor.org.uk.

If you have any further questions or queries then please don't hesitate to get in touch.
